

United International University
CSE-322[C]-Software Engineering Laboratory
Online - 2
Full Marks: 20
Total Time: 50 minutes

If any portion of your submission is found to be similar to another submission, both submissions will be marked as zero.

Use the assigned name only. You must use any AJAX API

1. Create a Database named **FIFA2022**. Inside the database create two tables named **GroupX** and **MatchY**. (Here Y is the team you support and X is the group of that team)
2. In the **GroupX** table create three columns named **Team, Point and Position**.
3. In the **MatchY** table create six columns named (**TeamA, GoalA, TeamB, GoalB, PointA, PointB**) which are three match results of the Y team in group stage.
4. Create two buttons named **GroupX** and **MatchY** in an HTML **index.html** page.
5. After clicking the button, the page will show the corresponding table only in the view.
6. Marks Distribution (**Database - 5, GroupX button action - 5, MatchY button action- 5, Code submission and code structure - 5**)
7. Submit **FIFA2022.db** , **index.html** and **read.php** (You may use multiple php files if needed) file only in a zip file named your **studentId**.
